Compile Result

```
sum is 30
```

Algorithm

- Step 1: Start
- Step 2: Declare `int add(int i, int j);`
- Step 3: Initialize `int sum, a = 10, b = 20;`
- 3.1 `sum = add(a, b)`
- 3.2 Print `sum`
- Step 4: Declare Called function (`int add(int i, int j)`)
- 4.1 `int sum;`
`sum = i + j;`
`return sum;`
- Step 5: Stop
